

NABOJO - AI Context Reference

Company Overview

NABOJO is a French EdTech startup creating interactive digital literature to reconnect children (ages 6-12) with deep reading and improve their language and comprehension skills.

Mission

Give pre-teens the desire to read, making them better readers, improving their language skills, and helping them succeed in school and life.

Vision

Grow a generation of young people who read, express themselves, and think better, in a world where attention, language, and critical thinking are becoming more precious than ever—while that attention is being preyed upon by addictive, low-quality content.

Core Problem

Children aged 7-19 in France spend an average of **3h11 per day on screens vs. only 19 minutes reading**. 38% of 16-19 year-olds don't read at all for pleasure. Screen addiction and shallow content are damaging attention spans, impoverishing language, and hurting academic performance. OECD data shows 15-year-olds in 2022 are nearly a year behind in reading level compared to 2018.

The Product

Physical Device

An **interactive e-reader** (€119.99) designed specifically for children:

- E-ink display (no blue light, no eye fatigue)
- Completely offline (no notifications, no distractions, no internet)
- Lightweight and designed exclusively for interactive reading
- Described as "the e-reader for pre-teens" or "a narrative text-based game console for kids"

Digital Content

Interactive digital books that adapt to each child's reading level:

- Pricing: €1-3 per book, or €10/month subscription for full catalog access
- Format: Modern reimagining of "choose your own adventure" books

- Combines literary quality with game mechanics (choices, exploration, character progression)
- Uses multimodality (text, images, sound) to maintain engagement
- Adapts difficulty and vocabulary based on child's reading level
- Rewards attention and text comprehension with story progression

Content Library

- Varied stories: mysteries, fantasy worlds, dungeon adventures
- Licensed universes popular with pre-teens
- Classic French and European literary heritage
- Created with professional children's authors
- Validated by pedagogical experts
- Highly replayable—multiple paths and discoveries

Core Values

1. **Designed by parents, for families** - rooted in educational and family realities
2. **Family trust** - transparency, security, lasting relationships with parents
3. **Respects attention** - refuses attention-capture mechanisms, dark patterns, and addictive logic
4. **Literary and pedagogical excellence** - high-quality, stimulating, beautiful, educational content

Product Promise

A new formula of interactive digital literature that adapts to the child's reading level, delivered on a dedicated, disconnected interactive e-reader device.

Key Differentiators

vs. Traditional Apps/Tablets:

- **Content design:** Developed for deep reading immersion, not short addictive content
- **Pedagogical approach:** Applies latest research in digital literature and cognitive science
- **Adaptive:** Assesses and adapts to each child's reading level
- **Dedicated hardware:** E-ink, no blue light, no notifications, disconnected
- **Business model:** Publisher-based (sales), NOT ad-based (no incentive to capture attention)

vs. Paper Books:

- **Interactive:** Player agency affects story outcomes
- **Adaptive:** Adjusts difficulty to ensure accessible challenge
- **Engaging:** Game mechanics make reading feel like play
- **Multimodal:** Text, images, sound work together
- **Modern:** Meets kids where they are with digital engagement

Target Audience (Parents)

1. Parents already aware of screen effects on attention, language, and reading habits
2. Parents whose children have drifted away from reading and want to reignite interest
3. Parents seeking smarter, calmer, more useful digital experiences for their kids
4. Parents of primary school children focused on ensuring academic success through reading mastery

Brand Tone

Warm, protective, engaged, and demanding

NABOJO speaks to families with kindness and respect. The brand inspires trust without infantilizing. It takes a clear stance on the harmful effects of certain digital uses and refuses to normalize attention-capture mechanisms. The tone remains constructive: clear-eyed about the problem, firm in its convictions, always oriented toward a positive alternative.

We are: warm, reassuring, engaged, clear, demanding

We are NOT: infantilizing, technophobic, moralizing, alarmist, overly academic, coldly institutional

Key Messages

For Parents

"A quality reading experience, immersive and distraction-free, capable of reigniting the desire to read while enriching vocabulary, imagination, and concentration."

For Children (6-12)

"An interactive narrative adventure where you can explore a world, make choices, and shape the story through reading."

For Educators/Prescribers

"An innovative, engaging, quality reading tool that reconciles young people with text without sacrificing literary excellence."

For Investors

"NABOJO addresses a fundamental problem—reading decline and attention capture—with a differentiating approach at the intersection of publishing, interactivity, and mindful technology. The ambition is to build a new category of cultural and educational products."

Educational Benefits

- Improves reading and language skills
- Enhances text comprehension and critical thinking
- Builds sustained attention and concentration
- Expands vocabulary with rich, varied language
- Reduces risk of academic dropout (reading difficulties at age 7 multiply dropout risk at 15 by 4x)

Privacy & Safety

- Minimal data collection (only reading level assessment data, optional but recommended)
- No data resale
- No advertising
- No in-app purchases or hidden commercial mechanics
- Closed ecosystem - only NABOJO publishes content for the device
- No interaction with other users (6-12 age range)
- All commercial aspects managed by parents through dedicated app

Use Cases

- **Autonomous use:** Children can use independently
- **Session duration:** 20 minutes to 1 hour depending on age
- **Frequency:** Designed for daily use (deep reading requires thousands of hours of practice)
- **Save/resume:** Stories can be saved and resumed
- **Replayability:** Multiple paths, choices, and discoveries encourage re-reading

Technology Notes (Internal - Not Public-Facing)

- AI generative technology used for content personalization (custom avatars, voice interaction)
- AI helps decode child's intent for greater freedom of action
- AI analyzes reading level and adapts content accordingly
- Content is pre-written; AI helps match child's input to most relevant story branch
- All AI-generated content reviewed by humans for quality and safety

Pricing Model

- **Device:** €119.99 (one-time purchase)
- **Content:** €1-3 per interactive book (individual purchase)
- **Subscription:** €10/month for full catalog access
- **Free content:** Some stories available for free

Competitive Positioning

"The new generation of 'choose your own adventure' digital books"

"Like Lunii's story factory, but for 6-12 year-olds—and we don't just tell them stories, we make them want to read through our interactive digital book-game concept."

"The e-reader for pre-teens and tweens."

Product Status (Updated)

Current focus: Ages 6-12 (pre-teens/tweens)

Primary platform: Dedicated e-reader device

Future: Potential teen product (12-17) may follow

Quick Reference Summary

What it is: Interactive e-reader with adaptive digital literature for kids 6-12

Core promise: Make reading as engaging as games, without the harmful effects of screens

Key innovation: Combines literary quality + game mechanics + adaptive difficulty + distraction-free hardware

Business model: Device sales + content sales/subscriptions (NOT advertising)

Main benefit: Reconnects children with deep reading, improves language skills and academic success

Parent value prop: Healthy screen alternative that actually improves reading instead of replacing it
